

PROTOTYPE CHECK

Due Date: Tuesday, 11/26, during class

Team Assignment

Points: 10

Each team will be checked by the instructor during class on 11/26 to ensure that teams are on track to complete their final demonstration prototype. At this check, prototypes do not need to be fully functional, but should show progress toward and potential for what they might ultimately become. Photos and/or videos may be presented if your prototype is being constructed off campus or in a nearby lab space.

Note: Purchased items not having been delivered cannot be an excuse for lack of progress.

How Will You Be Graded?

10 points: design/building (DB)

- adequate progress and potential demonstrated by prototype under construction
- appropriate amount of functionality (does not need to be fully functional)
